To Whom My Concern:

I have been the personal physician of Mr. Donald J. Trump since 1985. His previous physician was my father, Dr. Jacob Bornstein. Over the past 29 years, I am pleased to report that Mr. Trump has had no significant medical problems. Mr. Trump has had a recent complete medical examination that showed only positive results. Actually, his blood pressure, 110/60, and laboratory test results were astonishingly excellent.

Over the past two decades, he has lost at least fifteen pounds. Mr. Trump takes 81 mg of aspirin daily and a low dose of a statin. His PSA test score is 0.18 (very low). His physical strength and stamina are extraordinary.

Mr. Trump has suffered no form of cancer, has never had a hip, knee or shoulder replacement or any other orthopedic surgery. He has only surgery for an appendectomy at age ten. His cardiopulmonary status is excellent. He has no history of ever using alcohol or tobacco products.

Pleased, Mr. Trump, I can state unequivocally, will be the healthiest individual ever elected to the presidency.

North Korea Missile Tests, ‘Very Standard’ to Trump, Show Signs of Advancing Arsenal

As North Korea fired off a series of missiles in recent months — at least 18 since May — President Trump has repeatedly dismissed their importance as short-range and “very standard” tests.

Kim Jong-un, North Korea’s leader, Mr. Trump explained recently, just “likes testing missiles.”

Now, American intelligence officials and outside experts have come to a far different conclusion: that the launchings downplayed by Mr. Trump, including two late last month, have allowed Mr. Kim to test missiles with greater range and maneuverability that could overwhelm American defenses in the region.

Acting Intelligence Chief Refuses to Testify, Prompting Standoff With Congress
Dear Chairman Burr and Chairman Schiff:

I am reporting an ‘‘urgent concern’’ in accordance with the procedures outlined in 50 U.S.C. §3033(k)(5)(A). This letter is UNCLASSIFIED when separated from the attachment.

In the course of my official duties, I have received information from multiple U.S. Government officials that the President of the United States is using the power of his office to solicit interference from a foreign country in the 2020 U.S. election. This interference includes, among other things, pressuring a foreign country to investigate one of the President’s main domestic political rivals. The President’s personal lawyer, Mr. Rudolph Giuliani, is a central figure in this effort. Attorney General Barr appears to be involved as well.

As national security professionals, many of us have long been concerned with President Trump’s actions and their implications for our safety and security. Some of us have spoken out, but many of us have eschewed politics throughout our careers and, as a result, have not weighed in publicly.

The revelations of recent days, however, demand a response. Specifically, all of us recognize the imperative of formal impeachment proceedings to ascertain additional facts and weigh the consequences of what we have learned and what may yet still emerge. We applaud those Members of Congress, including Speaker Pelosi, who have now started us down that necessary path.

President Trump appears to have leveraged the authority and resources of the highest office in the land to invite additional foreign interference into our democratic processes. That would constitute an unconscionable abuse of power. It also would represent an effort to subordinate America’s national interests—and those of our closest allies and partners—to the President’s personal political interest.

Overall, the Congressional Budget Office estimates that tariff-related uncertainty and costs have shaved 0.3% off of US economic growth, while reducing household income by an average of $580 since 2018.

Trump to Hannity on WHO saying coronavirus death rate is 3.4%: "I think the 3.4% number is really a false number. Now this is just my hunch, but based on a lot of conversations ... personally, I'd say the number is way under 1%."
The Fake News Media and their partner, the Democrat Party, is doing everything within its semi-considerable power (it used to be greater!) to inflame the CoronaVirus situation, far beyond what the facts would warrant. Surgeon General, “The risk is low to the average American.”

So last year 37,000 Americans died from the common Flu. It averages between 27,000 and 70,000 per year. Nothing is shut down, life & the economy go on. At this moment there are 546 confirmed cases of CoronaVirus, with 22 deaths. Think about that!

37 million Americans caught the flu and 37,000 died. You say that 546 caught this virus and 22 died. Let’s do the math. If 37 million Americans catch this virus then 22/546*37000000 = 1,490,842 will die.

Think about that. Einstein!

Rabbi Jack Moline, President of the Interfaith Alliance, said: “Seeing Trump standing in front of St. John’s Episcopal Church while holding a Bible ... is one of the most flagrant misuses of religion that I have ever seen.”

Let me be clear. This is revolting. The Bible is not a prop. A church is not a photo op. Religion is not a political tool. God is not your plaything.

Flu season is coming up! Many people every year, sometimes over 100,000, and despite the Vaccine, die from the Flu. Are we going to close down our Country? No, we have learned to live with it, just like we are learning to live with Covid, in most populations far less lethal!!!
New FDA Rules make it more difficult for them to speed up vaccines for approval before Election Day. Just another political hit job! @SteveFDA

Adolf Hitler > Quotes

“The size of the lie is a definite factor in causing it to be believed, for the vast masses of the nation are in the depths of their hearts more easily deceived than they are consciously and intentionally bad. The primitive simplicity of their minds renders them a more easy prey to a big lie than a small one, for they themselves often tell little lies but would be ashamed to tell a big one.”
